

Ashleigh Magloire

Junior Backend & Full-Stack Engineer

Early career Backend and Full-Stack Engineer building production-style applications with Python, FastAPI, Java, Spring Boot, React, TypeScript, PostgreSQL, Docker, and REST APIs.

Experienced in developing authenticated APIs, database-backed dashboards, CI/CD workflows, monitoring tools, and accessible frontend applications.

Technical operations and ADAS experience at Tesla has strengthened my troubleshooting, data-quality, systems analysis, and cross-functional collaboration skills.

PROJECTS

AI HR Support Assistant

- React | TypeScript | FastAPI | PostgreSQL | SQLAlchemy | Alembic | Docker | GitHub Actions
- Built a full-stack HR support dashboard with employee, HR, and administrator workflows.
 - Developed FastAPI endpoints, PostgreSQL persistence, SQLAlchemy models, and Alembic database migrations.
 - Implemented mock AI ticket classification, priority assignment, suggested response drafts, filtering, sorting, and ticket-status updates.
 - Added backend, frontend, and Docker CI workflows using GitHub Actions.
- | **GitHub:** <https://github.com/Iris408/ai-hr-support-assistant>

Inventory Management System

- React | TypeScript | FastAPI | PostgreSQL | SQLAlchemy | Docker | Tailwind CSS
- Built a responsive full-stack inventory dashboard with authenticated CRUD operations, search, filtering, sorting, and stock-status tracking.
 - Developed FastAPI analytics endpoints for inventory value, category summaries, low-stock items, recent items, and dashboard statistics.
 - Integrated the React frontend with PostgreSQL-backed APIs and deployed the application using Render and Vercel.
 - Added backend, frontend, and Docker CI checks with GitHub Actions.
- | **GitHub:** github.com/Iris408/inventory-management-system

System Health Monitor

- Python | FastAPI | Docker | Prometheus | Grafana | GitHub Actions
- Built a Python monitoring service that tracks CPU, memory, disk usage, and system uptime.
 - Added structured logging, alert cooldowns, recovery notifications, Slack/email alerts, and FastAPI health and metrics endpoints.
 - Containerised the application with Docker Compose and integrated Prometheus scraping and Grafana dashboard visualisation.
 - Added Docker health checks and GitHub Actions validation for application startup and health endpoints.
- | **GitHub:** <https://github.com/Iris408/system-health-monitor>

Bloom - Calm Routine, Focus & Progress App

- React | JavaScript | Tailwind CSS | FastAPI | Accessibility-focused UI | Vercel
- Built an accessibility-focused routine, task, focus, progress, and reflection application designed around calm, neurodivergent-friendly interaction patterns.
 - Developed responsive public and protected layouts, guided demo workflows, theme controls, text-size settings, OpenDyslexic support, and reduced-motion options.
 - Prepared the FastAPI backend for JWT authentication, environment-based CORS configuration, account persistence, and protected application access.
 - Managed iterative releases, UI testing, documentation, Git workflows, and public beta preparation.
- | **GitHub:** github.com/Iris408/bloom-app | **Live demo:** <https://bloom-app-three-xi.vercel.app/>

EXPERIENCE

Tesla, London – ADAS Engineer
FEB 2025 - PRESENT

- Support ADAS data collection and validation workflows across Europe.
- Investigate data-quality, operational, and system issues in vehicle testing environments.
- Collaborate with engineering and operations teams to improve reliability and efficiency.

Tesla, London – Operations Specialist
MAY 2023 - FEB 2025

- Supported high-volume operational workflows in a fast-paced technical environment.
- Investigated workflow, customer, and system issues across multiple business areas.
- Contributed to process improvements and issue resolution across cross-functional teams.

London | Edinburgh, United Kingdom
Open to International Relocation & Global Team Environments

TECH STACK

Languages

Python | Java | JavaScript | TypeScript | SQL

Backend
FastAPI | Spring Boot | REST APIs | Pydantic
SQLAlchemy ORM | JPA/Hibernate | JWT
OAuth2 | Alembic

Frontend
React | TypeScript | Vite | Astro
Tailwind CSS | CSS | Responsive UI

Databases
PostgreSQL | SQLite

DevOps & Tools
Docker | Docker Compose | Git/GitHub
GitHub Actions | CI/CD | Linux | Render | Vercel | Prometheus | Grafana

Additional Development
API testing | Pytest | JUnit foundations
Java/ Spring Boot development
AWS and Kubernetes foundations

EDUCATION

Heriot-Watt University
MSc Computer Science
January 2026 – Present

CERTIFICATIONS

IBM Devops & Software Engineering Professional Certificate

(Expected September 2026)

LANGUAGES

English
Native

Japanese
JLPT N4; studying toward N3
Technical Japanese in progress
