London · Edinburgh

SKILLS

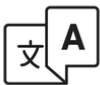

- Languages:** Python, TypeScript, JavaScript
- Backend & APIs:** FastAPI, REST APIs, SQLAlchemy, JWT/OAuth2
- Data:** PostgreSQL, SQL, relational data modelling, database migrations
- Frontend:** React, Next.js, Tailwind CSS
- DevOps & Delivery:** Linux, Git, Docker, Docker Compose, GitHub Actions, Vercel, Railway
- Testing & monitoring:** Pytest, API testing, Prometheus, Grafana

EDUCATION

Heriot-Watt University
Masters of Science (MSc) in Computer Science

Online 01/2026 – Present

LANGUAGES

Japanese	Conversational

Ashleigh Magloire

Junior Backend & Full-Stack Engineer

SUMMARY

Junior backend and full-stack developer with nearly five years at Tesla, progressing from trainee and operations roles into ADAS vehicle operations and engineering. I bring experience in ADAS data validation and operational problem-solving. Through projects including PartsPilot and Bloom, I build Python/FastAPI services and PostgreSQL-backed applications with React and TypeScript. Currently completing an MSc in Computer Science at Heriot-Watt University and building client websites through Iris & Oak, my independent web studio.

EXPERIENCE

Tesla UK | London

Apr 2022 – Present

ADAS Engineer | 02/2025 – Present

- Support ADAS data collection and validation workflows across Europe.
- Investigate data-quality, operational and system issues in vehicle testing environments.
- Work with engineering and operations teams to improve reliability and efficiency.

Operations & IT Specialist → Delivery Advisor | 05/2023 – 02/2025

- Managed high-volume operational workflows against KPIs, service levels and delivery requirements.
- Provided first-line technical support, investigated system and process issues, and coordinated resolutions across internal teams.
- Completed 3,000+ vehicle handovers, guiding customers through vehicle systems and maintaining accurate operational records.

Tesla Trainee EMEA | 04/2022 – 05/2023

- Rotated across service and mobile service, parts advising, customer service and support, delivery, home delivery, sales and management, gaining experience with departmental workflows, SLAs and KPIs.
- Managed 100+ sales enquiries per day across phone, live chat and email, following up leads through to purchase.
- Supported showroom sales by explaining vehicle specifications, guiding customers through test drives and helping progress sales.
- Offered a full-time position at the end of the trainee programme.

PERSONAL PROJECTS

PartsPilot

Automotive Inventory & Analytics Platform

Next.js · TypeScript · Tailwind CSS · Python · FastAPI · PostgreSQL Docker · GitHub Actions

- Built a full-stack inventory platform with authentication, parts and supplier management, search and filtering, stock monitoring and operational dashboards.
- Connected the frontend to FastAPI/PostgreSQL APIs, adding validation, error handling, CSV export, analytics, Docker-based development and CI checks.

GitHub · github.com/iris408/partspilot

Live Production Demo · partspilot.uk

v3 .NET migration in progress

Bloom

Accessible Routine & Focus Application

React · TypeScript · Tailwind CSS · FastAPI · PostgreSQL · JWT · Docker

- Developing an accessibility-focused application for tasks, routines and focus sessions, with responsive interfaces and configurable accessibility controls.
- Preparing the next live beta with authenticated accounts and persistent data using FastAPI and PostgreSQL.

GitHub · github.com/iris408/bloom-app

Live Demo · bloomapp.uk

v2 live · v3 in development

Pulse

Infrastructure Health Monitor

Python | FastAPI | Docker | Prometheus | Grafana | GitHub Actions

- Built a containerised monitoring service with health checks and host-resource monitoring.
- Exposed metrics for Prometheus and created Grafana dashboards for CPU, memory, disk usage and uptime.
- Added structured logging, automated alerts and GitHub Actions checks to support issue investigation and reliable updates.
